LAN's Supported in New Project Manager Release.
NEWS RELEASE September 12, 1986 p. 11

Applied MicroSystems, Inc. began shipping release 4.00 of its popular **project management** package, PROTRACS, today. The new release offers numerous enhancements over earlier versions. The company has...

... Gantt charts can be produced in either 2-month or annual formats. It produces a **complete** set of status and loading **reports**. These **reports** can be routed to either screen, printer, or disk. Earlier versions of the program could handle up to 150 **tasks** per project. Release 4.00 can **track** from 400 **tasks** (on a 256K computer) to 2000 **tasks** (on a 512K machine) in each project. The ability to **report** across multiple projects is now included. PROTRACS **reporting** capability has been generally beefed up with the addition of a new **ad hoc report** generation facility. In addition to the standard **reports**, users can now customize their own **reports** for special needs. Applied MicroSystems has added local area network (LAN) support to the new...

... in a LAN environment can now share the same project files for

updating
or simply **reporting** . PROTRACS prevents two users from having
read/write
access to the same project file at...

Making teamwork work

Castrucci, Steve; Glen, Ron

I.T. Magazine v25n1 PP: 21-27 Jan 1993

ISSN: 0008-3364 JRNL CODE: CAD

WORD COUNT: 1939

...ABSTRACT: automates standard, repetitive, and complex operations, while work group software serves business professionals and their **ad hoc** communications and data access needs. Effective work flow software should readily prioritize, assign, and re-assign **tasks** and allow for integration to other data and software. On the other hand, **project management** software, which is a type of groupware, should include change control modules and allow for roll up of information by a central manager. However, despite these features, **project management** software has failed to gain widespread corporate acceptance because it often lacks the flexibility to...

...work groups. Work flow software will develop more features that closely parallel the way complex **activities** are performed and managed. Easier integration with existing data and software will follow. ...
...TEXT: It is called work flow software.

The second is aimed at business professionals and their **ad hoc** communications and data access needs. It has commonly been termed groupware, or work group software. A major subclass of groupware is **project management** software that addresses **tasks** usually performed by teams.

Work flow software easily accommodates repetitive and detailed business procedures. They...

...over the update of tasks.

An estimating facility should furnish an historical perspective on previously **completed** tasks, and a "what if" facility should allow for testing changes to the schedule. There...

...notification of tasks that are behind schedule or in danger of putting the project off **track** .

There should be the capacity to input and export data to and from some common...off either until it undergoes dramatic changes and becomes more relevant to general business use.

Project management packages are used a great deal in the

construction
industry and on major projects of...

...says. But they have not yet adequately addressed the needs of the modern office where **ad hoc** groups are formed to tackle certain projects, then are disbanded when the work is done, and other groups are created to handle other **jobs** .

"I've seen some nice features in packages that are not considered just project management...

The IT strategy audit: Formulation and performance measurement at a UK bank

Carrie, Wendy

Managerial Auditing Journal v10n1 PP: 7-16 1995

ISSN: 0268-6902 JRNL CODE: MAJ

WORD COUNT: 6306

...TEXT: difficulties facing project managers in discerning appropriate financial and non-financial performance criteria for ongoing **monitoring** and control of IT projects. The unpredictable and often haphazard nature of IT systems fuels...

...a series of stringent quantitative performance targets on technical staff based on the estimated time **completion** of software development work. Yet the interaction between project sponsors (the client), IT project managers...committee is to assist in managing the IT function by:

- * participating in the planning process;
- * **monitoring** the **progress** of projects;
- * ensuring adequate user commitment;
- * resolving conflicting priorities for IT resource where necessary.

The...

...unbudgeted expenditure (IT projects over L5 million require approval from the board of directors);

- * to **monitor** **progress** of all development projects;
- * to set priorities and settle user disputes.

Figure 1 outlines the...

...review, monitoring and control of project scope, plans and budgets;

* the submission of proposals and **progress reports** to the divisional technology steering committee;

* the overall management of the progress of IT projects...the project manager knew little about the software package he was working with and imposed **ad hoc** deadlines based on guesswork rather than a thorough understanding of the capabilities of the analyst...performance measurement and control process, he said that the bank had developed a system to **monitor** IT projects. But the focus was purely on financial measurement

such as estimated cost of...

...managers and understanding of the business were all important, they were excluded in IT project **reports**. Instead, project managers incorporated details of how project tasks were broken down into units and...

...technical enhancements) relating to an IT project with the corresponding time-scale for task duration/ **completion** and member of the team responsible for the work. (Table III omitted)

One senior business...

...a problematic exercise where formal rule-book methodologies often give way to an informal and **ad hoc** approach to strategy formulation. The two competing IT **project management** styles of results orientation and organizational learning shared the same basic objective--to enhance business...

...programmers the opportunity to perceive a system holistically rather than simply design software on an **ad hoc** and piecemeal basis. Yet organizational learning as a strategy to enhance competitive advantage through IT...

...managers commenting that teamwork and communication skills were all-important, intangibles were excluded from IT **progress reports**. Instead, effective IT **project management** was perceived as an organizing, **monitoring** and controlling **activity**. Financial performance measures were selected to ensure that IT projects remained within budget.

The compartmentalization...

GeneMill 1.5 From Pangea Systems Expands Project Management Capabilities of

DNA Sequencing Laboratories

BUSINESS WIRE

September 15, 1998

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 518

... in full partnership with biopharmaceutical industry's gene discovery efforts." "GeneMill will enable us to track our physical resources and data better than we could ever hope to do with our...

... Beach, Florida. GeneMill 1.5 provides capabilities for efficiently managing sequencing projects, from registration to tracking to archiving, thus dramatically improving laboratory throughput without risking the quality of results. Users can minimize the costs of tracking resources and progress, due to automated data management and an advanced design based on relational database technology that easily supports rapidly growing volumes of projects, samples, and inventory. Powerful, extensible record-keeping, inventory-tracking and reporting capabilities enable the elimination of many laborious project management and administrative tasks. Moreover, by consolidating data in a secured, centralized relational database that is accessed through an...
